

The Driver Assign feature allows drivers to assign/unassign themselves to/from a vehicle and view assign/unassign history from their iOS mobile devices.

Assigning to a Vehicle

Upon login to the **App**, the Vehicle Assignment screen displays.

► How to assign yourself to a vehicle:

Note. A list will not appear if this is the first time you have logged in to the App or you have not yet assigned any vehicles previously.

1. Assign a vehicle using one of the following options:

- **1-** Enter the vehicle ID (associated ID in the Portal) in the text field
- **2-** Tap on a vehicle ID from a list of vehicles that you have assigned yourself to previously using the **Driver App**
- **3-** Tap on the QR code* icon to scan with your mobile device

Note. If you are using the QR code: The first time you tap on the QR code icon, a prompt appears stating: “Driver Would Like to Access the Camera.” Tap **OK** to use the QR code to assign a vehicle. If you select **Don't Allow**, you will not be able to scan the QR code and you are returned to the Vehicle Assignment screen. If you would like to enable camera access to the Driver App at a later time, you can make this change in your phone settings.

Note. *If you would like your drivers to use the QR code scan method, you must have QR stickers created that are unique to each vehicle (associated with VIN or Vehicle ID) and affixed to the vehicle.

2. If you have entered a vehicle ID in the text field (Option 1), tap **Assign**.

You are now assigned to the vehicle. The Driver App displays:
