Getting Started

Link: https://help.nuvo.solutions/docs/getting-started/ Last Updated: February 8th, 2019

First Steps

Installing your Device

Installing your GPS device is as easy as plugging in. The PNP-2000 is a non-diagnostic tracking device intended for light-duty vehicles (’95 or newer) with an OBD-II port.

Use the following link to learn how to install your device:

I want to learn about:

- PNP-2000 Installation Guide

Meeting the Portal

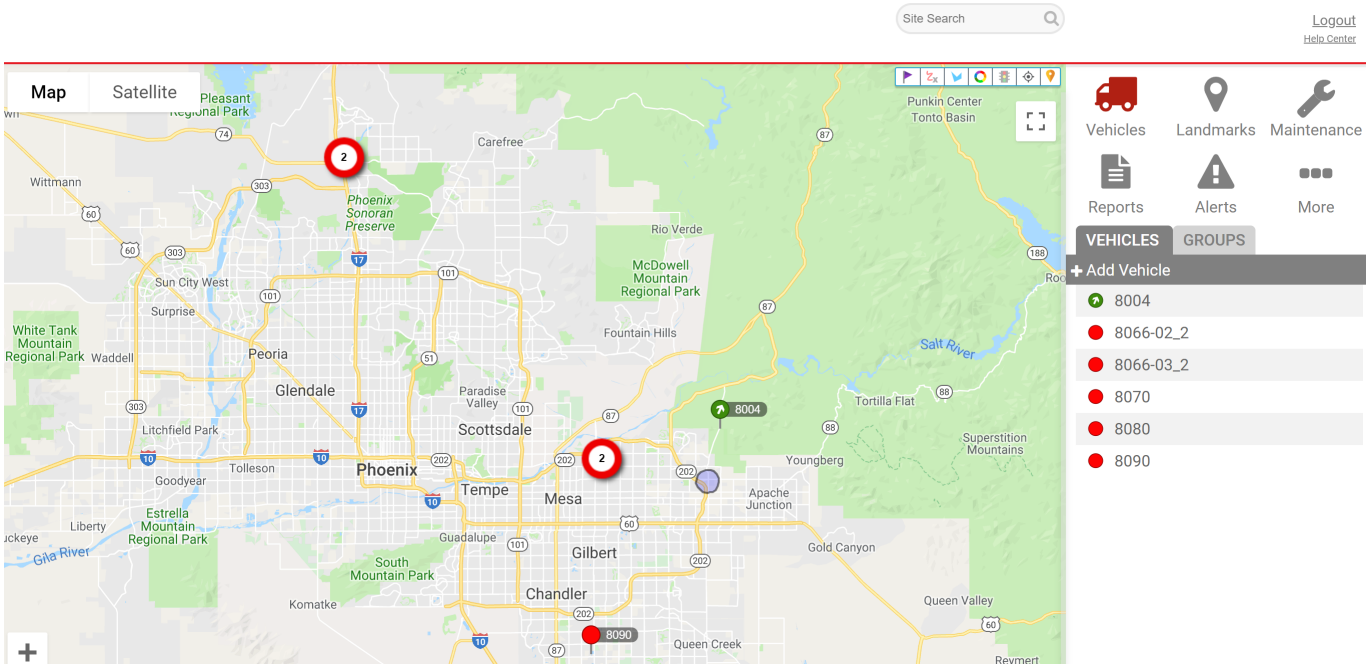

Navigate to the Portal and log in with your provided credentials. After you have successfully logged in, what you see is your default screen. This is the Map, it allows you to see the location of each of your vehicles on the left side of the screen and your controls are positioned on the right side of the screen.

Use the following link to learn how to use the Map:

I want to learn about:

- About Maps

Mastering the Map

Exploring Map Features

Next, you will want to explore scheduling reports, configuring alerts, and managing vehicles.

Use the following links to learn how to master the Map with helpful resources:

I want to learn about:

- Reports
- Alerts
- Vehicles

Using Your Resources

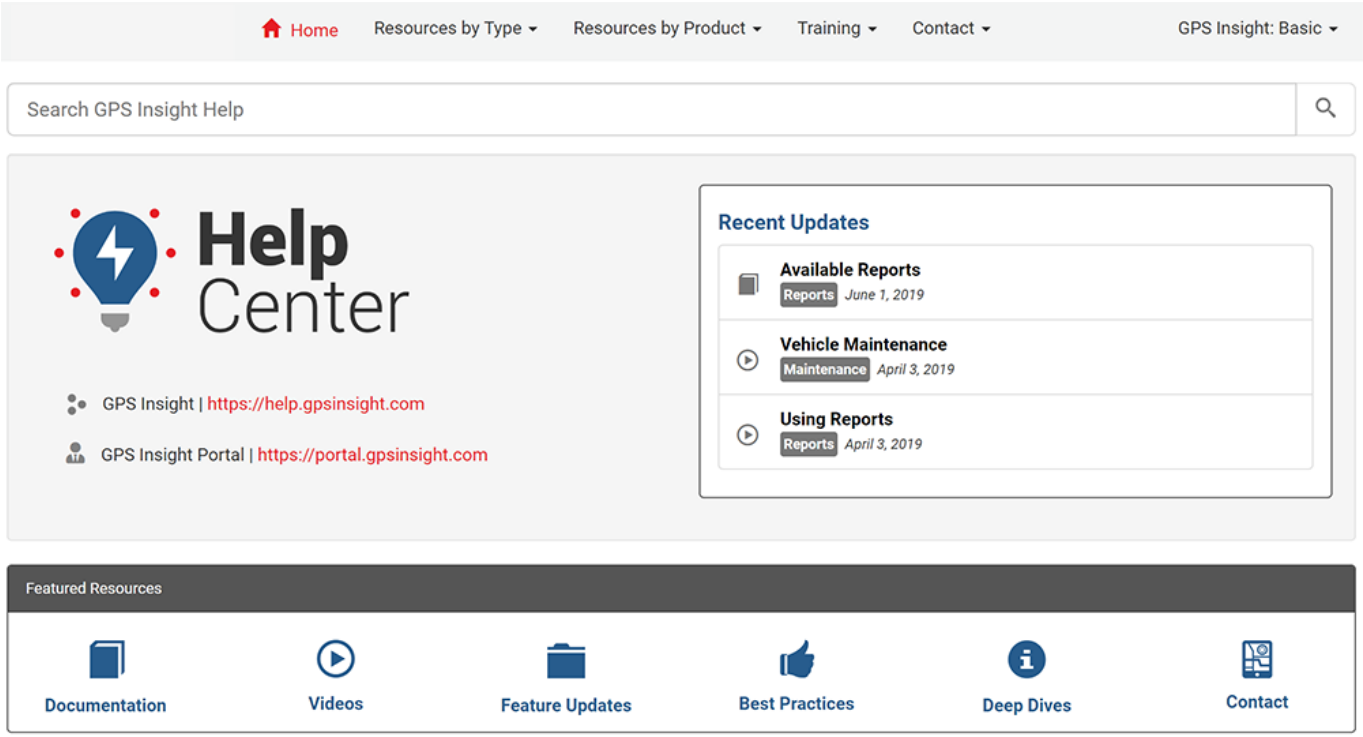

Continuing Your Education

Many self-service resources are also available on the GPS Insight Help Center such as product documentation, online help, video tutorials, product updates, Best Practices, Deep Dives, knowledgebase articles, and more.

First Steps

Logging In

Head over to the Portal to login with your credentials. The Portal requires Internet connection (DSL, broadband, or network connection recommended).

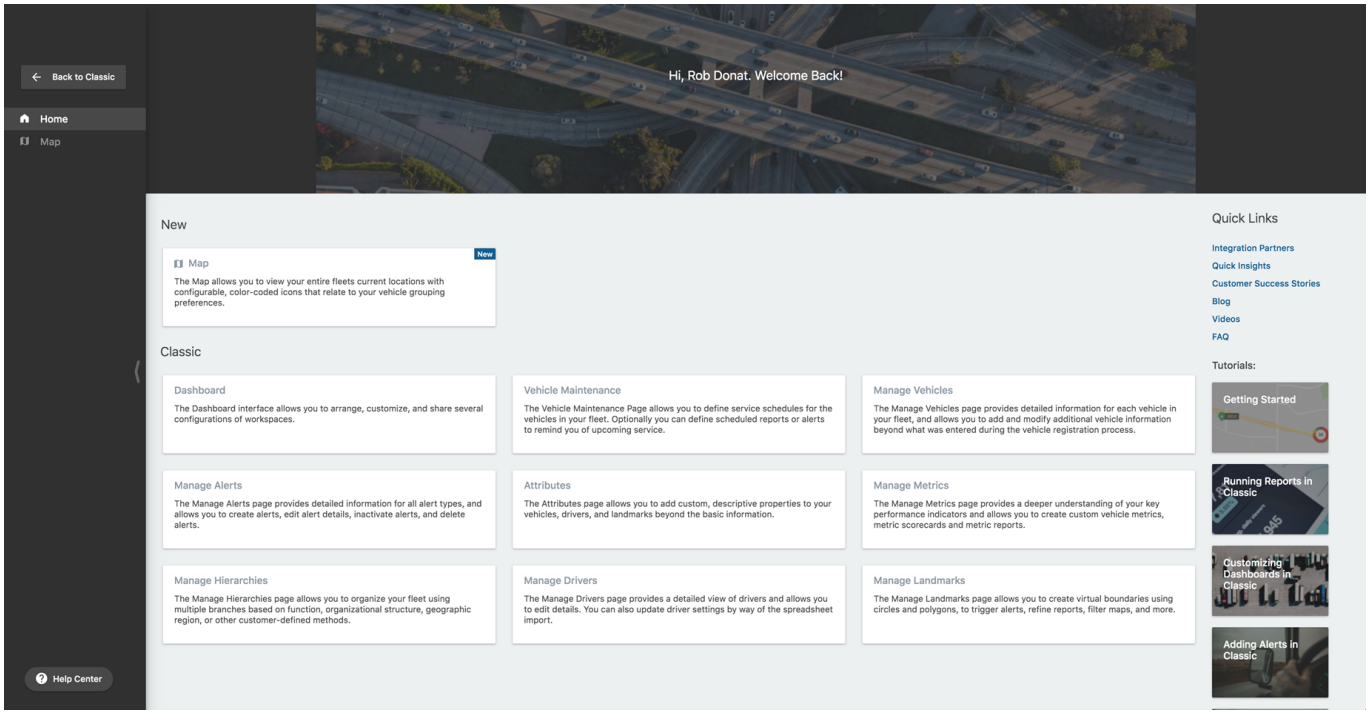

Meeting the Portal

Once you have logged in with your credentials, the Homepage from the new Portal is displayed by default.

Use the following link to learn how to use the Homepage and Map in the new Portal:

I want to learn about:

- Homepage and New Map

Mastering the Portal

Exploring Portal Features

Next, you will want to explore creating landmarks (also known as geofences), adding attributes, scheduling reports, configuring alerts, and using integrations from the Portal.
