

This Product Release Notes announcement for Standard and Enterprise customers includes notification of new hardware and updates for the Portal.

Hardware

Introducing the Geotab GO9™ Tracking Device

The GO9 is an all-in-one plug & play device for light-duty and heavy-duty vehicles providing high-fidelity reporting with increased information that leads to more detailed and actionable insights. This device accurately recreates vehicle trips.

For more information about the GO9™, please see [GO9™ - FAQ](#) and the [GO9™ Device Page](#).

Portal

Device Type Identification – Vehicle Card

The Vehicle Card now displays the device type installed in the selected vehicle. With this update, you can quickly and easily identify the installed device on a vehicle via the Admin tab on the Vehicle Card.
