

Tablet is Not Switching to Drive Automatically

Link: <https://help.nuvo.solutions/troubleshooting/tablet-is-not-switching-to-drive-automatically/> Last Updated: August 29th, 2023

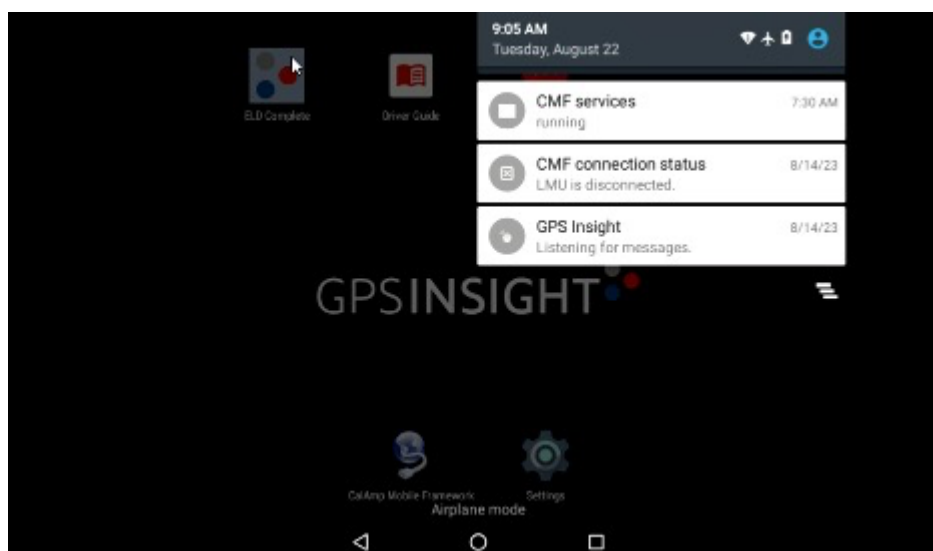

Once logged in to the ELD Complete app on the tablet, your status should switch to Drive automatically once the vehicle starts moving. If it does not, please complete the troubleshooting steps provided below.

1. Undock the tablet.
2. Press and hold the power button, then tap **Power Off** on the screen.
3. Once the tablet is fully powered down, place the tablet back into the cradle ensuring it is securely docked in place.

The tablet should automatically start to power-on once docked.

4. If it does not, check that:
 - a. the tablet cable plugged into the back of the dock is securely plugged in. If not, try unplugging the cable and plugging it back in.
 - b. the vehicle's engine has been started
5. Once the tablet is powered back up, swipe down from the top of the screen.

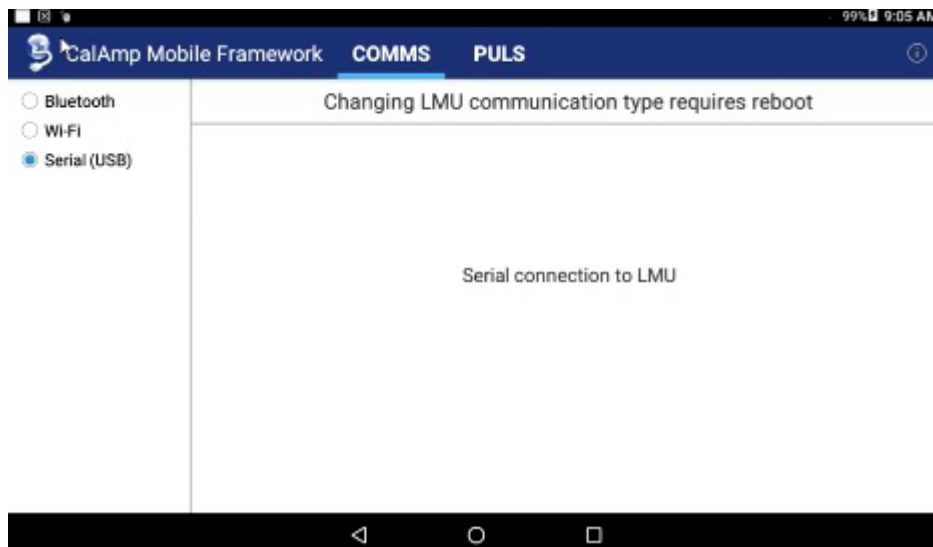

This will bring down a menu. Look for CMF Connection Status, it should state "LMU is Connected."

6. If you see "LMU is Disconnected", tap **CMF Connection Status**.
7. Serial (USB) should always be selected on the left side of the screen. If it is not, tap **Serial (USB)** it to change it, then reboot the tablet.
